- 4 a) Read the first part of the article about Basic English and choose the correct verb form.

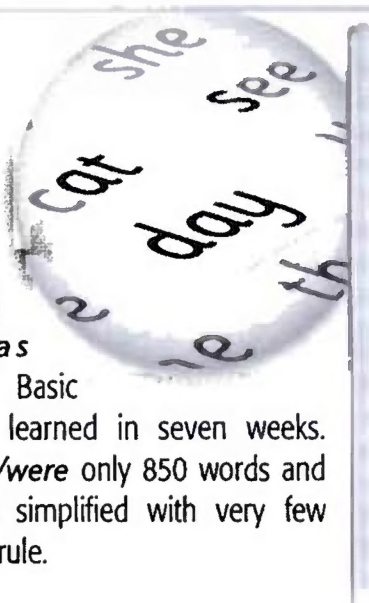

The man who made English easy

The idea of inventing an international language is not a new one. Over the past 180 years, linguists ¹*have created/created* over ten different languages that ²*are based/be based* on German, Spanish, English and even musical notes. One of the most influential of these ³*have been/was* Basic English.

By 1923 the First World War ⁴*was/had been* over for five years, but Europe was still ⁵*recovering/recovered* from its effects. Charles Kay Ogden, a linguist and writer, was

running several bookshops in Cambridge. He ⁶*had just/just* published a book which described how we use language. The success of his book ⁷*had inspired/inspired* Ogden to design a universal language – something that was much simpler than English, but ⁸*doesn't/didn't* require native English speakers to study a different language. In 1930 Ogden's book *Basic English: A General Introduction with Rules and Grammar* ⁹*was/were* published. It is estimated that,

on average, it ¹⁰*takes/took* about seven years to become fluent in English. Ogden ¹¹*believed/was believing* that Basic English could be learned in seven weeks. There ¹²*had been/were* only 850 words and the grammar was simplified with very few exceptions to each rule.

- b) Read the second part of the article and fill in the gaps with the correct form of the verbs in brackets.

The language ¹*attracted* (attract) the attention of educators all over the world, but its development ² (interrupt) by the Second World War. After the war, both the British Prime Minister and the President of the United States ³ (look) for ideas that might promote world peace. They both

⁴ (give) speeches that supported the use of Basic English.

In the past 60 years, the language ⁵ (have) some success. In some parts of East Asia, teachers ⁶ (still; use) Ogden's word lists. However, in the main, the language has disappeared. But now that we

⁷ (know) that there are many more non-native than native speakers of English, recently some linguists ⁸ (ask) whether we should revisit Ogden's ideas. And the Wikipedia website has started a version of their main encyclopedia which ⁹ (write) in Basic English for non-native learners of the language.

PHIL Sorry, where were we? Yes, Professor Shavick. He's a bit strange, ¹ isn't he? I ² interviewed by him so we hadn't met before.

SARA Neither ³ I when I started here. And I must admit – he ⁴ appear rather unusual when you first meet him.

PHIL Unusual? If I met him in the street, I ⁵ probably run away screaming. All that hair! He's been spending far too much time with his computer. He should get a little sunshine, ⁶ he?

SARA Well, perhaps.

PHIL Anyway. I ⁷ think I even asked you what you're doing your PhD in.

SARA Well, I ⁸ not doing a PhD actually. I, er, teach here.

PHIL You don't, ⁹ you?

SARA Er ... yes. Computer science, as a matter of fact. Sorry, I ¹⁰ going to say something earlier, but ...

PHIL How embarrassing. So, Professor Shavick is a colleague of yours?

SARA Um ... well, I suppose he's my boss really. But ¹¹ worry – I ¹² tell him anything! And not all computer scientists are like him, I promise!

1C Making the grade

Teaching thinking

- A Acting on an anonymous phone call, the police raid a house to arrest a suspected murderer. They don't know what he looks like but they know his name is John. Inside the house, they find a surgeon, a lorry driver, a mechanic and a fireman, all playing cards. Without hesitation or asking any questions, they immediately arrest the fireman. How do they know they've got the right man?
- B The answer to the puzzle is printed at the bottom of the page. But if you don't know it, try ¹ not to look (not look) yet! Read this article and then force yourself ² (think) a little harder.
- C In the 1960s Edward de Bono, a Maltese doctor and writer, invented the phrase 'lateral thinking'. De Bono believes that we understand the world by building up patterns based on experience. These patterns teach us ³ (recognise) familiar problems and situations and allow us ⁴ (make) simple decisions quickly. However, de Bono argues these patterns can also stop us from seeing the solution to a problem.
- D De Bono thinks that for every problem, you need ⁵ (check) your assumptions. What did you assume when you read the puzzle above? To think laterally means you must avoid ⁶ (make) assumptions about a problem and make yourself ⁷ (think) 'outside the box'.

- E Got the solution yet? No? Well, keep ⁸ (read) then think again.
- F De Bono once asked some children ⁹ (suggest) ways of estimating the height of a tall building. Asking the architect, dropping a stone from the top and measuring the time taken to fall were sensible suggestions. But one boy refused ¹⁰ (take) the question seriously. "Put the building on its side and measure it," he said. The class laughed. De Bono then managed ¹¹ (demonstrate) that this was actually a very sensible idea. You can put the building on its side, de Bono pointed out, in a photograph. And if you put something else in the photograph – that you know the height of – you can easily calculate the height of the building.
- G In fact children are often good at lateral thinking. With less life experience they bring fewer assumptions to a problem and so provide different solutions. So, if you can't answer the murderer puzzle yet, try asking a young person the same problem. You might ¹² (be) surprised at how simple they find it!

The surgeon, lorry driver and mechanic were all women. The fireman was the only

SOLUTION:

Reading

- 1 Read the article quickly and choose the best definition of lateral thinking.

Lateral thinking is ...

- a) a new way of thinking about old problems.
- b) a fun way of solving puzzles
- c) an alternative to traditional logic.

Verb patterns (1) V1.3

- 2 Read the article again. Fill in the gaps with the correct form of the verbs in brackets.

- 3 Read the article again. Which paragraph or paragraphs of the article:

encourage you not to give up thinking about the puzzle?

..... B

- 2 tells you what you need do you want to use lateral thinking?
- 3 explains why some people better lateral thinking?
- 4 gives an example of solving a problem by lateral thinking?
- 5 presents a lateral thinking problem for the reader to solve?
- 6 explains how he was traditionally deal with problems?
- 7 tells you where you can find the solution to the puzzle?

- a) Yes, we're thinking of moving to Paris.
- b) Bad memories from school, really.
- c) We don't know yet. Maybe painting.
- d) Pretty well, I think.

2 Complete conversations 1–5 with the correct question word and preposition.

~~Who~~ What How long Who Where

~~with~~ from for about to

1

TOM Eve is starting her own business.

SUE Really? Who with?

TOM It's just her at the moment.

2

SAM Alex has written a screenplay.

DAN No way!

SAM It's a thriller, I think. But I don't know the story or anything.

3

EDDIE We've got to give in our application forms soon.

NANCY? Do you know?

EDDIE I think you can just leave them with the secretary.

4

PAT I got this camera for less than half price.

MARY Did you?

PAT Some website my daughter told me about.

5

ANA Our teacher's going away next week.

STEPH?

ANA Almost a fortnight, I think.

3 Fill in the gaps in the conversation. Use one, two or three words.

TOM Eve! Hi!

EVE Tom! What a coincidence. I was thinking about you recently.

TOM ¹ Were you? Why ² that?

EVE I was wondering if Clare still does that pottery class.

TOM No, she gave that up a few months ago.

EVE ³ come?

TOM Well, we moved house in March so it's a bit far.

EVE Really? ⁴ to?

TOM Near here, actually. On Culford Street. Anyway, ⁵ going? Are you still teaching?

EVE Yes, but not for much longer, thankfully.

TOM What ⁶ mean?

EVE Well, I'm starting my own training business.

TOM ⁷ training?

EVE Presentations, mainly. But other stuff in the future.

TOM You've always been good at that kind of thing, ⁸? I guess teaching helps.

EVE Absolutely. Anyway, enough about me. What's Culford Street ⁹?

TOM Great. Much quieter than our old place. Of course, life is a little different these days.

EVE Different? In ¹⁰?

TOM Well, since we had the baby ...

EVE A baby? Congratulations! I had no idea!

Reading

- 1 Read the article quickly. What is the writer's advice to the organisers of the London Olympics?
- You should only choose team members who are 'visioners'.
 - Be aware of how different types of people work in different ways.
 - It is better not to employ both 'visioners' and 'organisers' on the same team.
- 2 Read the article again and fill in gaps 1–6 with the correct sentences a)–f).
- ~~Ever missed a deadline?~~
 - The team members with creative talents need uninterrupted time away from the 'do it now' culture associated with emails, texts and mobile phones.
 - At worst, they ignore the deadline or keep putting it off.
 - There will be criticism if the earliest targets for the Olympics are missed.
 - However, it's not always advisable to employ people with the same time profile.
 - They set their own deadlines and pay close attention to them.

Word building (1): suffixes V2.3

- 3 Complete the sentences with the correct form of the word in brackets. All the words are in the article.
- If you want to succeed, you may need to strengthen your team a bit more. (strong)
 - Good managers have to learn how to their time. (priority)
 - Luke felt that he had been given a rather workload. (challenge)
 - He really needs to his attitude to work this year. (improve)
 - Liz is for getting it finished on time. (responsibility)
 - Do you agree that it's a deadline? (real)
 - For this task you will need to use your (imagine)
 - I try and plan my time more carefully. (usual)
 - Has he got the to lead this project? (able)

No need for speed

¹ a) ? Well, spare a thought for the people who are responsible for organising the 2012 London Olympics. The 'to do' list remains challenging: 'build 80,000 seater stadium', 'improve London's transport infrastructure' and so on.

With the deadline still some years away, the organisers have plenty of opportunity to make sure that their teams include the right mix of 'time types' for the tasks they need to do. Disaster relief teams or flight crews depend on the ability of their staff to work at the same speed under time pressure. ²

Do you frequently lose track of time? Are you tempted to take risks? Do you focus on mid- to long-term goals? If so, you are probably a 'visioner'. Professor Mary Waller shows that employing a team which is almost entirely made up of 'visioners' is a high risk strategy. Workers with a 'visionary' time style tend to underestimate the time they need for a task. ³

Teams with a reputation for meeting deadlines usually include 'organisers', who monitor their time and prioritise their work. If you are anxious to achieve and rarely lose track of time, you might well be an 'organiser'. This type of person plans tasks and activities and is rarely impulsive. Whether they are working under low or high pressure, 'organisers' will rarely rely on other people's deadlines. ⁴

A strategy for success

Yet a strategy of mixing visioners and organisers is not always successful. If there is a need for imagination, having even one 'organiser' on the team can actually prevent the multi-tasking which is necessary for tasks needing an input of new ideas.

⁵ In this way, they can play around with ideas before getting back together with the team.

⁶ But if officials take steps to make sure that their workers' individual time profiles are recognised, they will enhance everyone's performance. In this way they will be able to strengthen their teams and give themselves a more realistic chance of finishing on time.

- Some places where CCTV is installed.
- The popularity of CCTV in the UK.
- What people commonly think about CCTV.
- The shop owner's reason for installing CCTV.
- The advantages of CCTV.

Verbs and prepositions | V3.4

2 Read the first part again and choose the correct preposition.

Is CCTV looking out for you?

In my local corner shop a few weeks ago, I mentioned having an unwanted TV to the owner, Said. His normally bored face lit up. Within ten minutes we were back at my flat, apologising ¹to//for/at my wife ²off//for/on the noise – it was late – as we dragged an ancient TV out of the loft. As he left, he told me it would be great in the shop. And I assumed he meant for entertainment during quiet periods of the day.

A few days later I'm back in Said's shop and I spot my old TV on a shelf. But looking up at the screen, I see a picture of myself.

"Closed circuit television," Said announced, "to catch shoplifters." I look around the shop. It's a tiny place that would be impossible to steal from without being seen. But, of course, I couldn't explain this ³for/at/to him.

Said's decision to install closed circuit television (CCTV) is not unusual. In the last ten years, the British government has spent over £170 million ⁴in//for/on CCTV equipment. An estimated four million CCTV cameras in the UK mean that you probably appear on a CCTV screen about 300 times every day! What's more you don't need to apply ⁵with/to/of

anyone ⁶to/over//for permission to install a CCTV camera.

So, they are everywhere: from busy shopping centres to the quietest corners of public parks.

3 Read the second part of the article. Fill in the gaps with the correct verb and preposition.

PREPOSITIONS with for to about (x 2)

Most British people approve of CCTV. It makes you feel safer, they say. It discourages crime and helps to solve it, they add. And if you've ever seen CCTV images of a criminal on the news, it's hard to disagree. However, recent studies have ¹provided us ²with the facts about 'Big Brother' style security. There is no evidence that CCTV stops criminals from committing crimes. And so you certainly shouldn't ³_____ on it ⁴_____ your safety.

Opponents of CCTV also ⁵_____ ⁶_____ the issue of personal privacy. A few years ago Geoffrey Peck was walking along an Essex street, in a highly depressed state. He attempted suicide, but was spotted by a CCTV camera. The police were called and fortunately he survived. However, the local council gave the images to the BBC. They were shown on TV – to approximately nine million viewers – and Geoffrey's face was clearly visible. He ⁷_____

- 3 Read this interview with a person who has started a reading group. Cross out any words in **bold** which you can leave out.

CAREY What exactly is a reading group?
 POLLY Well, it's basically a few people ¹**who** meet from time to time to talk about what they liked and disliked about books ²**which** they've all read.
 CAREY What made you decide to set one up?
 POLLY I think the main reason ³**that** we started it was to provide a focus for people to meet and talk about something other than their work or family!
 CAREY And what kind of people do you invite?
 POLLY Oh, the people ⁴**who** come range from young mums to professional writers!
 CAREY Who decides on the books ⁵**that** you're going to read?
 POLLY We all do! Whoever comes to the meeting decides on one to read next time.
 CAREY How often do you meet?
 POLLY The number of meetings ⁶**that** we have will depend on how busy we all are. No more than one a month.
 CAREY Do you ever invite guest speakers?
 POLLY We do occasionally invite someone ⁷**whose** book we find particularly interesting, but only if they live fairly near.

- 4 Read this description of a novel and fill in the gaps with *who*, *that*, *which*, *whose*, *where* or *when*.

A book ¹ that. I really used to love when I was a child was *Black Beauty*. It's a story ² takes place in nineteenth-century England at a time ³ people were often cruel to animals. It's a kind of autobiography written from the horse's point of view about its experiences with a variety of owners. As a young horse *Black Beauty* lives happily in a place ⁴ everyone is kind to him. Unfortunately, when the owner has to go abroad, he sells him to a family ⁵ are not so kind. He goes on to have a lot of bad experiences, ⁶ is the sad part of the story, but it does all end happily in the end. Although people think of it as a children's book, this is a novel ⁷ helped to influence thinking about the way we treat animals and so it's a book ⁸ message is timeless.

The wrong Guy!

The story of Guy Goma is not one of stupidity. A former taxi driver from the French Congo, Mr Goma was at the BBC TV centre for an interview, in the hope of becoming an IT assistant. So when a producer came up to him and said, "Guy Kewney, isn't it? About the IT thing?" he agreed, ¹because /due to he thought she had just got the wrong pronunciation of his surname.

Mr Goma, who had taught himself English after he moved to England four years previously, was rushed into a studio, where he found himself in front of the cameras, having questions thrown at him. How could he know that the man who'd been sitting on a nearby sofa was also called Guy? In fact Guy Kewney was an IT expert, who was waiting to go on live TV to be interviewed about a legal dispute with Apple computers.

"It all happened so fast," Goma told *The Sun* newspaper. "I had just signed my name in reception when someone said 'Follow me'. She was walking so fast that I had to jog to keep up with her. ²Even though/However a lady put some make-up on me and I was fitted with a microphone, I just thought it was all part of the job interview and when I

realised I was on air, what could I do? I just tried to answer the questions and stay calm."

Viewers of the most watched TV interview in months – it was posted on the Internet – have reacted with a mixture of delight and sympathy to the key moment when the BBC's Karen Bowerman introduced Goma as "Guy Kewney, head of newswireless.net!" Across his expressive face flit a dozen expressions in a second – mainly shock, fear, guilt and embarrassment – as he wonders what to do next. However, ³instead of/apart from saying there had been a mistake, he answered three questions before the BBC staff became aware of what had happened and brought the item to an early close.

Mr Goma was finally taken to his interview for the IT post, but ⁴even though/despite going through such a bad experience he didn't get the job. ⁵Nevertheless/Whereas Mr Goma is now in demand as a celebrity, ⁶due to/since hundreds of thousands of people have now watched his television appearance online.

- 5 The number of wild tigers is getting smaller and smaller than each year.
- 6 Spiders are farther more frightening than ants.
- 7 Rabbit's fur is as softer as feathers.

Why would anyone decide to keep a snake as a pet? They're only slightly more attractive ¹as/ than tortoises. And they're nowhere near as ²cute/cuter as rabbits – although you might have to feed your snake one. What's more, they're ³far/more harder to look after than most pets.

Well, despite these reasons, over a million people in the UK keep some kind of 'exotic' pet. Although that's considerably ⁴fewer/less people than those who have a cat, it's

⁵near/nearly as many as the number of people who own a goldfish. And I bet they don't describe their goldfish as 'fascinating'.

Snake owners are ⁶much/lot less strange than you might expect. Last week I met an enthusiastic Carla, from Birmingham – though I was a great deal ⁷fewer/less enthusiastic than Carla to meet her two pythons, Bart and Lisa. Unlike their cartoon 'cousins', Bart is not ⁸anywhere/quite as lively as Lisa and sits quietly throughout our meeting. Lisa, on the other hand, is clearly ready to play.

"Don't worry," says Carla. "She's ⁹no/not more dangerous than ¹⁰I'm/me."

- 2 Read the article again and look at the words in **bold**. What do they refer to, a) or b)?
- a) a congenital anosmic b) no sense of smell
 - a) the US b) anosmia
 - a) Max b) Max's doctor
 - a) food b) gases
 - a) milk b) freshness
 - a) problems b) anosmics
 - a) having a sense of smell
b) having no sense of smell
 - a) a cure b) Max's wife
- 3 Are the sentences true (T), false (F) or the article doesn't say (DS)?
- ☒ T The writer never learned about anosmia at school.
 - ☐ Max has never been able to smell.
 - ☐ Congenital anosmics are nearly always diagnosed soon after they are born.
 - ☐ Most anosmics have no sense of taste.
 - ☐ Anosmics use special refrigerators for food.
 - ☐ It is more common for those who get anosmia later in life to get depressed.
 - ☐ Most anosmics recover without medical help.
 - ☐ Max's wife is also anosmic.

"I miss the smell of my son's hair"

- A Years ago I remember a school experiment where we wore blindfolds* to simulate being blind and, on another occasion, wearing headphones to experience being deaf. However, I don't remember talking about not having a sense of smell. In fact, I wasn't aware that some people couldn't smell until I met Max Christian. Max is a congenital anosmic – ¹which means he was born without a sense of smell. The condition is called anosmia. And in the US alone there are over two million people who have ²it. Some were born that way, but most developed it as a result of an illness or injury.
- B Amazingly, but not unusually, Max's anosmia wasn't discovered until he was in his twenties. At first his doctor didn't believe him. But after hospital tests, which simply involved smelling increasingly strong chemicals, Max's condition was confirmed. "Wow, there really is nothing, is there?" Max remembers ³him saying.
- C One of the worst implications of having no sense of smell is a significant loss of taste. The taste of food is a combination of sensations from your tongue and, much more importantly, the smell of gases from ⁴what you are chewing. "Water, apple juice, onion juice. I can't tell the difference between them!" Max admits.
- D Day-to-day life also gets a lot more hazardous without the warnings that a sense of smell provides. Think of the times you've left something on the stove for too long. The first sign of that an anosmic gets is the smoke. And have you ever checked the freshness of milk by smelling ⁵it? "I've been off work sick countless times because of food poisoning," says another sufferer.
- E Congenital anosmics are often quite practical about their sense of smell. They've never had one, so they can't miss it. But for some, especially ⁶those who have developed anosmia later in life, the effect can be very upsetting and lead to serious depression. "I miss Angel, my perfume, though I still wear it every day. I miss the smell of my son's hair, the smell of roses ... and even snow," says the personal account of a woman whose head injury left her an anosmic. "I feel like not smelling has left me missing a part of life ⁷that everyone else takes for granted."
- F The good news for non-congenital anosmics is that there is a chance they will regain their sense of smell – either naturally or by medical treatment. But for those like Max, there's little hope. He's unconcerned. "I wouldn't try a cure in case ⁸it had psychological effects," he says. "My wife would probably appreciate a fix though – she gets fed up with being asked to do 'smell tests' for me."

*blindfold = a strip of cloth which covers someone's eyes and stops them from seeing

The French don't really make 'small talk' either. ⁶ to strangers such as taxi drivers or shop assistants, especially politely, is seen as rather strange. Another difference is that people ⁷ to dinner parties in France will expect to take part in a serious discussion, with guests often ⁸ asked their opinions on 'big issues'. British people, despite ⁹ discussions about house prices and education, are sometimes surprised if their guests want to talk about anything serious, such as politics or art.

- 1 It's a small world
- 2 Don't jump to conclusions
- 3 First impressions
- 4 The rules of attraction

- 2 Read the article again and decide whether the following sentences are true (T) or false (F).

- 1 ☒ F People don't usually form an opinion of someone before they've spoken to them.
- 2 ☐ People everywhere nod their head to say 'yes' and shake their head to say 'no'.
- 3 ☐ It is impossible to smile properly if you don't feel like it.
- 4 ☐ If we are attracted to someone, we often find ourselves doing what they do.
- 5 ☐ The most universal form of communication is one we're not usually aware of.
- 6 ☐ Body language doesn't always mean what you think it does.

Guessing meaning from context V6.3

- 3 a) Look carefully at the eight words in **bold** in the article and put them under these headings.

VERBS 1 wrinkle, 2 _____

3 _____

NOUNS _____

ADJECTIVES 4 _____, 5 _____

- b) Match the words in 3a) to the meanings a)–h). Look carefully at the context.

- a) make the muscles tight so that small lines appear on the skin wrinkle
- b) the circular black areas in the middle of your eyes _____
- c) close and open your eyes quickly _____
- d) behaving as if someone is criticising you _____
- e) parts of the body that can move if you tighten and relax them _____
- f) interesting and lively _____
- g) behave as if you are attracted to someone _____
- h) grow weaker, disappear _____

Reading the signs

A

Most experts agree it takes between 90 seconds and four minutes to decide what we think about someone, and although we would like to think this is due to our **sparkling** conversation, 80 per cent of this impression actually comes from our body language. And this is before we've even opened our mouths! Of course, what you say will obviously matter later on in the relationship, but it does mean you need to get the body language right straight away or people won't stay around long enough to find out how fascinating you really are!

B _____

Many gestures, such as how you say 'yes' or 'no', are country specific, but others are universal. For example, all people **wrinkle** their noses and raise their top lip to show they find something horrible, even though the things which actually disgust us are often very different. Everyone knows what a smile is, too, and when you're only pretending to smile. This is because **muscles** around the eyes are linked to the emotional part of your brain, which are very hard to control, and they only work when you really mean it. Also, a real smile will **fade** after a few seconds, whereas fake smiles will last much longer.

C _____

There are also signals to tell us whether someone fancies us. When people **flirt** with you, they will make eye contact. Their **pupils** will enlarge and they will **blink** more often. Admirers will also mirror your behaviour, often unconsciously. So if you lean forward or take a sip of a drink, you will find that they will do the same. However, there is another gesture we are probably unaware of, but which is used by every culture on Earth and which some experts claim is the most instantly recognisable non-verbal human greeting. When we first see someone we find attractive, our eyebrows rise and fall and if they feel the same, they raise their eyebrows, too. It's not surprising if you have never noticed, since the whole process only lasts about a fifth of a second!

D

A last warning; don't judge people on one thing alone! Look for four signals before you believe it. Sitting with arms crossed might mean someone is being **defensive**, but then again, it might just mean they're feeling cold!

- ☒ Justin Hall was one of the first bloggers.
- ☐ Justin invented the word 'blog'.
- ☐ Blogger.com was the first website that helped people publish their blog.
- ☐ Blogs have significantly changed the way some people read the news.
- ☐ Approximately 60 million people write in their own blogs every day.
- ☐ Some bloggers have left their jobs to write full-time.
- ☐ Heather Armstrong was fired because she wrote about her colleagues on her blog.
- ☐ Heather still writes her blog.

All about ... Blogs

Diary writing has been part of literature all over the world since ¹pre historic times. And online diaries are making the genre more popular than ever.

The first is thought to be Justin Hall's *Links from the Underground*. Justin wrote a detailed and honest account of his life between 1994 and 2005. At its peak, his website was receiving thousands of visitors a day.

Three years after Justin's first post, someone came up with a term for what he, and a few other people, were writing – a weblog. The word comes from the words *web* and *log*^{*}. Then in 1999 a fellow diarist jokingly ² wrote the word as 'we blog' and soon the English language had a new verb: *to blog*.

The early bloggers needed some technical computing skills to make their pages. But from 1999, websites such as *blogger.com*,

which helped anyone to publish their own blog, started to appear. The phenomenon of blogging exploded. By 2001 there were about a million blogs on the Internet – from 'what I had for breakfast, lunch and dinner today' blogs, receiving few, if any, visits – to protesting ³ war blogs, read and commented on by hundreds of people every hour.

Now it is accepted that blogs have ⁴ defined journalism. They can report on news events within a few minutes and can include photos and even video. Their readers can participate in the debate on the blogs, adding additional information and links. The news has never been so interactive.

About 60 million people now ⁵ publish their diaries, thoughts and observations online – although this is undoubtedly an ⁶ estimate because many of them are

never updated. The ⁷ stop rise of blogs is in part due to money. When Google bought *blogger.com* in 2003, it gave its users the ability to put adverts on their websites. Popular blogs can now earn thousands of dollars a month through this method and advertising on blogs is now a ⁸ million dollar business.

Blogging has not been without controversy, of course. ⁹ employees of famous fast food restaurants have written revealing accounts of their previous employment. Most famously, Heather Armstrong's blog *dooce* included a diary of her day at work. Even though the names were changed, it was seen by her company, who fired her for 'professional ¹⁰ conduct'. Now *dooce* is part of the English language, too. It means 'to fire someone for writing about their job in a blog'!

*log = a written record or diary

Dealing with money **V8.1**

1 Choose the correct words.

In the money?

Going through university is a huge financial challenge, with students increasingly getting part-time jobs to get them through their years of study. We asked four students at Birmingham University what they would do if they won a lot of money.

Jane, a first year economics student, said, "I'd put most of my winnings into a ¹*current/* ~~savings~~ account so I could get a high interest ²*rate/rating*. Then I'd save up to go on holiday. I'd love to visit Australia."

Her friend Claudia, who studies chemistry, was keen to ³*invest/repay* the ⁴*loan/credit* on her car before she did anything else so that she could stop worrying about how she would pay for it. Then, she added, "I'd spend the rest ⁵*for/on* my family for once because I'm always borrowing from them when I'm short ⁶*from/of* money."

Law student Rob told us, "It would be lovely to pay ⁷*money/cash* for something instead of always buying ⁸*in/on* credit."

And, Jason, in his final year of a computer science degree, said "If I were well ⁹*off/in*, the first thing I'd do is to invest money ¹⁰*on/in* an online business."

It's not just the money

- A Not long ago, British entrepreneur Richard Branson announced that he had bought an island off the coast of Australia for all his 30,000 staff and their families to use. For employees of his company, Virgin, this must be one of the most attractive, if rather unusual ¹ **benefits** of the job!
- B Most company perks are more practical than this, but they do appear to be an increasingly important consideration when choosing a job. Typical of these perks, but still valued, are ² **reductions** to the price of lunch, discounts on company goods or services, child care facilities, interest-free loans and pensions and investments in the company. Particularly popular with employees is membership of a gym or health club and private health care. Keen to reduce sickness and stress, employers have generally been happy to support this trend and the past ten years have seen an increasing demand for on-site services such as massages and yoga. However, the appeal of perks such as cars, laptops or mobiles, which used to be a measure of a person's importance in the company, is declining in favour of benefits which better reflect the priorities of modern life. Material possessions are not the most important consideration these days.
- C Surveys show that ³ **pay** isn't ⁴ **the be-all and end-all** once a person is settled in a job. Job satisfaction and personal achievement were named as the top motivators by almost 77 per cent of managers recently, and recognition of their contribution was thought to be twice as important as financial reward. Christine Garner, who is head of organisational development at the Industrial Society, believes that giving staff a choice of benefits showed that a firm was 'forward thinking'. "Parents may want to take ⁵ **extra** holidays to be with their children. Older people may want more medical benefits and younger staff may prefer additional money."
- D Richard Prior, spokesperson for the publishing house Redwood, thinks it's the little things that count and which are most ⁶ **appreciated** by staff. Last year he announced that all staff could take the day off on their birthday, as well as leave early on Fridays in the summer. "We haven't got huge amounts of money to invest in perks, but little gestures can make a big difference." These may also include the chance to work at home sometimes, extra leave after a child is born, and US-style 'duvet days', when ⁷ **employees** might decide to have a day's holiday without prior notice. Other companies let workers trade in some of their salary for extra ⁸ **leave** or give them the opportunity to take time off to study or travel with the guarantee of a job when they return.
- E Recent research has found that twice as many UK professionals would rather work fewer hours than win the lottery. Being able to choose when they work and what benefits are most appropriate allows employees to balance work and home life. It's fast becoming the number one perk.

The passive G9.1

2 Read the article and choose the correct verb form.

The British film industry

One way the success of a country's film industry can ¹ measure/be measured is by the number of films produced each year. But other factors have to ² consider/be considered, such as how much money is invested in a film and how much money the film ³ makes/is made. The British film industry has always had more enthusiasm than money – as a timeline of its fortunes shows.

In the 1940s British cinema was hugely successful and 1.4 billion cinema tickets ⁴ sold/were sold every year.

By the late 1950s this figure ⁵ had fallen/had been fallen to around 500 million. Films began to ⁶ make/be made that appealed specifically to both American and British viewers in order to guarantee profitability.

The 1960s was a decade of quality British film making. In 1962 the first James Bond film ⁷ released/was released, along with the classic *Lawrence of Arabia*. However, over the next ten years audiences continued to ⁸ fall/be fallen to just 193 million in 1970.

In fact, the 1970s were disastrous for British film. Little money was ⁹ investing/being invested and in 1970 only 24 films ¹⁰ produced/were produced in the UK.

The 1990s saw a rebirth of British film making. While the money came from America, the stars and the scripts were ¹¹ providing/provided by the British, with hits such as *Four Weddings and a Funeral* and *Notting Hill*.

Now, audiences are ¹² increasing/being increased once more and the future for the British film industry looks bright. In 2007 a British-produced film, *The Queen*, won over 20 awards, including an Oscar for best actress, Helen Mirren.

Seeing things differently

- A Hanging on the wall of painter Esref Armagan's flat in Istanbul is a thank you ¹letter from Bill Clinton. Esref painted the ex-president of the USA and sent the portrait to him. He has never actually read the letter himself – or in fact, ever seen a picture of Bill Clinton. He's blind. He's a blind painter.
- B Esref was born in 1954 in a ²poor neighbourhood of Istanbul, Turkey. Both of his eyes failed to develop and for children like Esref, there were few opportunities for formal education. Unable to ³play with his friends, Esref became interested in drawing, first on walls with nails* and now with paint on canvas*.
- C Although it's impossible to say whether he had some vision as a baby, it's ⁴clear that he has never been able to see normally. And this makes Esref's work extraordinary. He paints everything from fish, fruit, boats and houses to portraits of people, but he has never actually seen any of these things. What's more, although his brain has never experienced ⁵light, Esref's paintings show shadows and perspective. So, how does he do it?
- D Esref has never had any formal training in painting. Instead, he says that he learned about things like colour and shadow from comments by friends. He knows that each object has an important visual quality called colour so he memorised the typical colours of things. When he first learned about shadow, he remembers, he assumed that something red would have a red shadow!
- E Esref's work has been exhibited all over Europe, America and even in China. But his skills as a blind painter have also been the subject of various scientific studies by neurologists. The results raise some interesting questions about how the brain works. When we imagine something we have seen in the past, we use a part of the brain called the visual cortex – the same part that we use when we actually see something. Tests ⁶show that Esref uses the visual cortex too, when imagining objects he knows and when drawing. So despite being blind, it seems that Esref can, in his brain, 'see'. And he does this so well that he can transfer these images into his paintings.
- F I ask Esref about the birds he loves to paint. He tells me that he used to own a pet shop that sold birds. "You can easily touch them." He pauses and smiles and says, "I love being surrounded by beauty."

DIY not?

If you watch British TV for a few evenings, you might think the UK is obsessed by DIY. However, a recent survey revealed that only one in four people under 30 can change a plug ¹ a) . Instead they usually get their dad ² b) it for them. And when they can't get something ³ c) for nothing, the under 30s pay for it. On average they spend £1,700 a year on ⁴ d) jobs done for them.

One problem is time. Mark, 27, says, "I work all week so weekends are my free time. I'd rather pay a decorator than paint my flat ⁵ e) ."

A second issue is confidence. Gina, 24, confesses, "My husband and I tried to ⁶ f) some leaking taps ourselves a few years back. We ended up flooding the bathroom and had ⁷ g) a plumber to come round on a Sunday!"

Gina also admits to not doing some jobs now because of the cost. "The last time we had our boiler ⁸ h) , we paid £400 for various 'problems' the engineer found. We're not getting it ⁹ i) again until it stops working!"

Modern electronic items are often difficult to repair ¹⁰ j) . And the cost of repairs reveals another growing trend. Mark tells us, "When my old laptop stopped working, I went to a shop to ¹¹ k) it repaired. But the estimate was over half the cost of a new laptop so I just bought a new one!"

When I look back on my childhood, I feel a bit ashamed. ¹ Both of my parents worked full-time, but my mum also did absolutely everything at home as well. I remember that ² Saturday night my dad made a meal, but during the week ³ us helped much. Certainly ⁴ ever suggested that my mum might need a night off. ⁵ was always spotless in the house and I remember that ⁶ of my friends used to be impressed that our house was so tidy. Nowadays ⁷ of my parents work any more and there are ⁸ demanding children in the house, of course. When we're together ⁹ helps with cooking and the clearing up. And mum ... she's still in charge!

HE SAID, she said ...

In today's ¹ workplace, a knowledge of the differences between men's and women's styles of communication is essential. Of course, it can be dangerous to generalise, but it's possible to identify some patterns that frequently apply to women and men.

Who talks the most?

The stereotype is that

² women would be ahead here. The truth is quite the opposite. In mixed-sex groups, men often spend more time talking than women. They tend to start more conversations, too.

Do men and women speak in a particular way?

Several ³ studies have attempted to show that women tend to be 'softer' than men in their requests and statements. For instance, they suggest they are more likely to use ⁴ or phrases like "Don't you think ...?" before statements. However, none of the evidence is conclusive.

Who interrupts?

This question is much more

⁵ Men are more likely to interrupt than women and women are also more likely to be interrupted than men. What's more, women actually allow themselves to be interrupted more than men.

Does it matter?

In short, yes. Research indicates that:

- People who talk the most are often seen negatively as controlling conversations. However, in decision-making groups, they also tend to become the leaders.
- Both males and females who use more direct language are perceived as more intelligent and often more able. Conversely, people see users of ⁶ language as less powerful.

What can we do about it?

We need to look at achieving a balance in the behaviour of men and women that will help both sexes to get their message across.

- Men need to be more conscious about how much they speak in relation to their female colleagues so that they are not seen as too dominant.
- Both sexes should avoid overusing 'soft' expressions and ⁷ questions such as "How's the project going?" Instead, use more closed questions such as "When will the next stage be complete?"
- Rather than simply interrupting more – and so becoming like men – women could concentrate on stopping themselves from being interrupted. Simple strategies such as insisting on finishing will help. Finally, men should consider delaying their questions until an interruption would be natural.

The Internet in a cup

Where do you go when you want to know the latest business news or keep up with the latest scientific and technological developments? Today the answer is obvious: log on to the Internet. Three hundred years ago, the answer was just as easy. You went to a coffee shop, or coffee house as it was called then. Collectively, Europe's interconnected web of coffee houses formed the Internet of the seventeenth century.

Like today's websites, coffee houses were lively and often unreliable sources of information. News and gossip were regularly passed between them and runners would go around reporting major events such as the outbreak of a war or the death of a head of state. Coffee houses were also popular places to have political discussions, which is why King Charles II tried, unsuccessfully, to have London's coffee houses closed down in 1675.

In the days before street numbering or regular postal services it became common practice to use a London coffee house as a postal address and regular customers would pop in to see if there was any post for them while they were checking up on the latest news. That said, most people frequented several coffee houses, as different locations attracted different people: Will's in Covent Garden was a popular venue for writers, the Westminster coffee houses attracted the politicians, businessmen went to the Royal Exchange and financiers to Lloyd's.

The drink that fuelled this network originated in Ethiopia, where the beans used to be chewed, rather than drunk. The first coffee house opened in 1475 in Istanbul, Turkey, a place where coffee was so important that it was legal for a woman to divorce her husband if he could not supply her with enough of the drink. A hundred years later, a coffee house was opened in Vienna and they spread quickly through Europe. The popularity of coffee owed much to the growing middle class, who preferred coffee to alcohol because they believed it stimulated mental activity.

Can the Internet claim to have had as much impact as the coffee houses? Perhaps. What is interesting, though, is how modern coffee shops, different from the old ones in so many other ways, now provide Internet access, so that people can sip their cappuccinos and find out the news of the day, just as they used to.

- 5 ☐ The red rain which fell on India could have been part of a comet.
- 6 ☐ The writer of the article doesn't really believe he has seen an alien.

Idioms | V12.3

3 Match the underlined phrases in the article to these definitions.

- 1 completely unexpectedly:
out of the blue
- 2 is very different from:
- 3 don't believe them fully
- 4 watch for something to appear:
- 5 a long way from towns and cities:

It's raining frogs

As I sit writing this, I glance out of the window. It's pouring down as usual. ¹ You could say that it's 'raining cats and dogs.' Not really, of course – it's only a saying. But that's not to say that in many areas around the world it hasn't rained things just as strange – or even stranger!

Weird rain is one of the more extraordinary phenomena that is reported from all corners of the globe from time to time.

² The logical explanation for such odd events is that a tornado or strong whirlwind picked up the animals from shallow water and carried them for hundreds of miles before dropping them. However, this has yet to be proved and it can't quite account for all the incidents.

A powerful whirlwind might well explain a rain of small fish, but not the ones that fell on a village in India. ³

..... They had come crashing down on them completely out of the blue. And on an otherwise clear day in Alabama in 1956, in a place in the middle of nowhere, a small dark cloud formed in the sky. When it was overhead, the cloud let go of its contents: rain, catfish, bass and bream – all of the fish alive. The dark cloud then turned to white and disappeared.

And the inhabitants of a city in southern Greece were surprised one morning in 1981 when they woke up to find small green frogs falling from the sky. Weighing just a few grams each, the frogs landed in trees and on to the streets. The Greek weather experts came to the conclusion they had been picked up by a strong wind. ⁴

..... That species of frog was native to North Africa.

Other objects can also rain out of the sky. There have been reports of crabs, birds, ice blocks and soft drink cans. Perhaps the most bizarre are the 'rains of blood' which have been reported from all over the world for thousands of years. Most people take these reports with a pinch of salt. ⁵

..... However, an Indian physicist has recently claimed that particles taken from the red rain showers that fell on Kerala in 2001 could contain microbes from outer space. This is a far cry from the 'sandstorm' theory. He speculates that the particles could be extraterrestrial bacteria adapted to the harsh conditions of space and that the microbes were carried on a comet or meteorite that later broke apart and mixed with the rain clouds above India.

Yeah, right! ⁶ But I'm still going to keep an eye out just in case. Wait a minute ... I think I saw something fall past my window. Was that an alien I saw?

Planning and drafting

Reading an article about learning languages
Writing planning and drafting an article
Review language ability; imperatives

1 Read the article quickly. Choose the best answer.

The article is aimed at:

- a) people who speak English, but want to learn another language.
- b) people who want to learn or are learning English.
- c) people who want to learn a language without going to classes.

Learning a language:

What? Why? How? When?

If you want to learn a new language, the very first thing to think about is **why**. Are you just fed up with speaking English when on holiday? ¹ **a)** Or perhaps you're interested in the literature, films or music of a different country and you know how much it will help to have a knowledge of the language. Whatever your reasons, there is a lot of truth in this old Czech saying:

*You live a new life for every new language you speak.
If you know only one language, you live only once.*

Assuming you know what and why you want to learn, how are you going to do it? ² And traditional classes are an ideal start for many people. They provide structure, support and an environment where you can practise under the guidance of someone who (usually) has an excellent knowledge of the language. But nowadays there are many more possibilities:

- The Internet – there are hundreds of websites with exercises including audio and even videos. And many are absolutely free. ³
- Think of all the ways you can use your current interests to learn a language. ⁴ Buy a CD of songs in the language and read the lyrics. Don't expect to understand everything, just enjoy getting used to the language.

Love reading? Readers – novels written or adapted especially for language learners – are available for all language levels. And research shows that reading is a highly effective way of improving your language ability.

- Take every opportunity you can to use your language – whether chatting with another language learner or ordering a meal in your local, say Italian, restaurant. The staff in my local hairdresser's shop are Lebanese and many of them are learning English. Every day they have an 'English hour' when they all speak English to each other, rather than Arabic. ⁵

We all lead busy lives and learning a language takes time. You will have more success if you study regularly, so try to

establish a routine. ⁶ Becoming fluent in a language will take years, but learning to get by takes a lot less!

Many people start learning a language and soon give up. "I'm too old," they say. Yes, children do learn languages more quickly than adults, but research has shown that you can learn a language at any age. ⁷ I've also heard people worry about the mistakes they make when learning. Well, relax and laugh about your mistakes and you're much less likely to make them again.

Learning a new language, at any age, is never easy. ⁸ And you'll be amazed by the positive reaction of some people when you say just a few words in their own language. Good luck!

2 Read the article and fill in gaps 1–8 with sentences a)–h). There is one extra sentence you don't need.

- a) ~~Do you need it for a practical reason, such as your job or your studies?~~
- b) And learning is good for the health of your brain, too.
- c) But with some work and dedication, you will make progress.
- d) Try searching for a few key words and prepare to be amazed by the results!
- e) It doesn't matter if you haven't got long.
- f) Or, if you can, join an evening class.
- g) It's difficult at times, but they have great fun!
- h) Are you a music lover?
- i) Well, most people learn best using a variety of methods.

Stage 1: Thinking of ideas and ordering them

Thinking about a career in teaching?

- ☐ Qualities of a good teacher
- ☐ Places to find more information about careers in teaching
- ☐ Work experience in a local school
- ☐ The demands of being a teacher
- ☒ 1 Why you might want to teach

- 5 a) Read the first draft of a paragraph from the article in 4. Underline four more mistakes.

Stages 2 and 3: Writing a first draft, checking and correcting

Not every person who wants to be a teacher should becomes one. The job is very hard work and requires you playing many different roles - beyond showing students, say, how to multiply the two numbers. A teachers day never ends with the last lesson of the afternoon. Teachers have to give up personal time for lesson preparation, marking homework, meetings, talking to parents and many more.

b) Rewrite the paragraph in 5a), correcting the mistakes you underlined.

Stage 4: Writing a final draft

Not every person who wants to be a teacher should become one.

- 6 a) Imagine that your employer or place of study has asked you to write an article giving advice to people considering your own career or course of study. Think of ideas and then put them in a logical order.

LETTERS

WHY isn't more being done to deal with the problem of 'screen bingeing', which we feel strongly is the real cause of so much illiteracy among kids?

In our research we found a new generation of children who are spending an average of 7.5 hours a day in front of the computer or TV. More and more often they are doing this alone in their bedrooms or on a portable screen. In many homes the family unit has completely broken down, with kids having no basic communication skills at all. This is obviously having a big impact on how they learn to read and write.

It's time we stopped blaming the school system and looked again at how we are bringing up our kids. Having a conversation with them from time to time would help! And it is also time for the government to take the issue of 'screen bingeing' very seriously indeed. Poor literacy is only one of the many problems caused by kids spending far too much time in front of the TV or computer screen.

There is a place for modern media, but like a lot of good things in life, we need a healthy balance.

Advice leaflets

Reading a police leaflet about personal safety
Writing leaflets: giving advice
Review conditionals; modals; crime vocabulary

1 Read the leaflet quickly. Choose the best title a)–c).

- a) **Self-defence and the law**
- b) **How to avoid being robbed**
- c) **Personal safety out and about**

The chances of you or a member of your family becoming a victim of violent crime in the UK are low. Violent crimes, such as mugging, by strangers in public places are still rare and are a very small part of recorded crime.

By taking a few precautions, however, you can make yourself even less likely to become a victim.

Line 7 Many are common sense and might be things that you already do. Making yourself safer doesn't mean changing your entire lifestyle, personality or wardrobe and it doesn't mean never going out at all.

- ¹ You will always be safest in bright, well-lit and busy areas. Walk down the middle of the pavement if the street is deserted.
- Try to look and act confident. Look like you know where you are going.
- ² Shout "fire" rather than "help" – it can get more results.
- When out, you shouldn't listen to a personal stereo through headphones, so you can stay alert to your surroundings.
- ³ If a vehicle suddenly stops alongside you, turn and walk in the other direction – you can turn much faster than a car.
- Try not to be conspicuous about the valuables you are carrying. Talking on your mobile phone, carrying a laptop or showing your friend your new gold ring all show thieves that you are worth robbing.
- You might like to spread your valuables around your body. For example, keep your phone in your bag, your house keys in your trouser pocket and your money in your jacket.
- If someone tries to take something from you, it may be better to let them take it rather than get into a confrontation and risk injury.

- You can use reasonable force in self-defence. You are allowed to protect yourself with something you are carrying anyway (for example, keys or a can of deodorant), but you may not carry a weapon.
- If you decide to defend yourself, be aware that your attacker might be stronger than you or ⁴ may take what you are using in self-defence and use it against you. It is often better just to shout loudly and run away.
- ⁵ You should always think about how you would act in different situations before you are in them. Think about whether you would stay and defend yourself (using reasonable force) and risk further injury or whether you would give an attacker what they want, to avoid injury. There is nothing wrong with doing either, but you should think about the options – there will be no time to do so if you are attacked.

A RELUCTANT STAR

A
One of Hollywood's top actors, Johnny Depp has followed an unusual road to stardom. Born in Kentucky in 1963 to a family with Cherokee ancestry, **they** lived in twenty different places before eventually settling in Florida when Johnny was nine. A teenage rebel, **he** dropped out of school at fifteen because of **his** unhappiness following his parents' divorce.

B
Over the next few years, Depp played guitar for several garage bands, achieving some local success with **one** called *The Kids*. **The band** relocated to Los Angeles in search of a record deal. **Unfortunately**, they struggled to survive in **such a competitive environment** and Depp had to do a variety of jobs, including selling pens. It was while he was **there** that Depp, at 20, married Lori Anne Allison, **who** introduced him to **her** actor friend, Nicolas Cage. It was Cage who encouraged Depp to take up acting himself.

C
Depp, although not keen on **the idea**, **reluctantly** auditioned for his first film *Nightmare on Elm Street* in 1984. *The Kids* split up soon after the release of **the movie** and Depp got other small parts. However, it was a TV series *21 Jump Street* which **suddenly** made him a teenage idol during the 80s. Embarrassed by **this**, Depp decided that from then on he would only appear in roles which he felt were 'right' for **him**.

D
He decided to wait for a more serious role to come along. **Luckily**, one soon **did**. In 1990 he starred in *Edward Scissorhands*, **which** brought him the critical acclaim he wanted. He **then** went on to appear in a wide variety of different films, including *Benny & Joon*, *What's eating Gilbert Grape?*, *Chocolat* and *Charlie and the Chocolate Factory*. Such films made him popular, but it was his role as Jack Sparrow in the smash hit *Pirates of the Caribbean* which made him an international star.

E
Depp's marriage did not last and his new partner is the French actress and singer Vanessa Paradis. They live with **their** two children in LA and the South of France and Depp continues to surprise us with film roles **that** are unusual and interesting. This will **probably** continue for years to come.

- a) ~~The power of the sun~~
- b) The dangers of sunlight
- c) Summary
- d) The benefits of sunlight for health
- e) The importance of sunlight to the world

The Science of Sunshine

What I want to do today is talk to you about the science of sunshine.

1

a) The power of the sun

Let me begin by looking at some key facts. The power of the sun is ¹ estimated to be 386 billion, billion watts. What this means is that in 15 minutes, the sun produces as ² energy as the world's population uses in a year. And if you're from somewhere with weather like the UK, did you know that a two-week holiday in a ³ country gives you the equivalent of a whole year of sun at home?

2

Like me, you probably only think about the sun when you're deciding what to wear in the morning. In fact, the sun is ⁴ essential to almost all life on earth. Plants use the energy of sunlight to change air into their food, humans and animals use the sun indirectly by eating the plants or plant-eating animals.

source = the place something comes from
crucial = extremely important or necessary

- 2 Read the presentation notes again and fill in gaps 1–10 with the best words.

- | | | | |
|------------------|------------------|---------------------|---------------|
| 1 a) guessed | b) approximately | c) <u>estimated</u> | d) roughly |
| 2 a) great | b) high | c) much | d) many |
| 3 a) sunshine | b) sun | c) sunlight | d) sunny |
| 4 a) very | b) extremely | c) absolutely | d) enormously |
| 5 a) Although | b) Even | c) However | d) Despite |
| 6 a) avoid | b) put off | c) check | d) prevent |
| 7 a) catch | b) get | c) obtain | d) find |
| 8 a) influences | b) concerns | c) moves | d) affects |
| 9 a) Approximate | b) Around | c) Close | d) Just |
| 10 a) a little | b) some of | c) a few | d) a bit |

3

Now let me turn to some of the main reasons why the sun is good for you. ⁵ we are often told that sunshine is dangerous, recent research show that sunlight can help to protect you from certain types of cancer. What's more it provides us with our main source* of vitamin D, which makes our bones stronger. The other main benefit is an emotional one. The sun can change your mood chemically and ⁶ depression.

4

As I said earlier, most of our vitamin D comes from sunshine. However, only ten minutes of sunshine each day gives us all we need. And even in the UK, it can take as little as half an hour to ⁷ sunburnt. The sun's energy reaches us in the form of ultraviolet radiation. And while this gives us a healthy-looking tan, it also causes skin cancer. This disease ⁸ about 50,000 British people every year. ⁹ half of Australians develop the disease in their lifetime.

5

So let me finish by saying the sun is crucial* to both us and the planet. And we should get ¹⁰ sunlight each day. However, too much sun can be extremely harmful to our health. And we must always make sure we take suitable protection against strong sunlight.

A town I love

A

The tiny town of Dalyan is in south-west Turkey, about twenty-five kilometres from Dalaman airport. This pretty village is situated away from the coast in a peaceful river setting, **overlooked** by pine covered hills and dramatic 4th century rock tombs **carved** into the cliffs.

B

Dalyan is the perfect place to unwind and relax and there are some amazing restaurants on the riverfront. I particularly look forward to sitting outside eating the delicious fish, caught in the lake that same day. There's also a wide variety of fascinating shops and a small market, where I enjoy looking for presents: soap **made** from olive oil, the traditional Turkish good luck 'eye', **supposed to** protect you from evil, or even a beautiful handmade carpet.

C

A custom which many visitors enjoy is bargaining over prices. The locals are delighted when you bargain with them and you will often end up paying less than half of what you were originally told. Try to respect other customs,

though, by remembering not to point or blow your nose. If you are taken to visit a mosque, remember to cover your shoulders and remove your shoes before going in.

D

The whole area is one of outstanding beauty and Dalyan provides a unique natural environment due to the mixture of salt water from the Mediterranean Sea and fresh water from Koycegiz Lake. Because of this, it is home to vast numbers of fish and other waterlife as well as the birds of various species – many of which are not found elsewhere in the world – which feed on them. Dalyan is also famous as one of the last remaining homes of the endangered Caretta Mediterranean turtles, which return to Iztuzu beach every year between May and September to lay their eggs.

E

The beach is famous for its fine sand, shallow turquoise sea and non-stop sunshine. It's the ideal seaside spot, **reached** by a short boat or bus ride from Dalyan, through spectacular

scenery. Local fishermen take visitors to see the surrounding sights. Those in search of history can be rowed across the river and walk up to the ancient Greek city of Kaunos, past the rock tombs to the ancient theatre, baths and temples. People **interested** in looking younger can take a boat trip to the hot springs and mud baths, **said** to contain anti-ageing properties. Nature lovers can go bird watching on Koycegiz Lake, **best done** in the early morning. You can have great fun in Dalyan, but in the end what makes it a place that I return to over and over again is the warmth and friendliness of the people who live there.

Ambitious plans for Four Walls?

THE CHARITY Four Walls' target this year is an ambitious one: £20 million. That's a 33% increase over last year's £15 million. This is significant given that Four Walls has only been in existence since...

E

Dear Thomas,

On 1 2nd April I will be beginning my 2 kilometre cycle ride from 3 to John O'Groats in support of Four Walls, the charity for homeless children in Britain.

Over one million children live in bad housing in Britain. That's enough to fill the cities of Edinburgh, Bath and Manchester. These children are living in damp, cold and infested flats and houses often poorly maintained by landlords. Or they are homeless, waiting in emergency housing for a permanent home.

Four Walls was only set up in 4 , but with the 5 raised last year Four Walls helped 14,312 children to get back into a home. In the year ahead Four Walls is aiming at increasing that total by 6 , to 7

I am asking each person who gets this letter to sponsor me for my ride. If you can help by giving 8 , that would be less than 1p per kilometre that I cycle! But if you can't afford that, any amount would be welcome.

Thanks so much for reading this letter. It means a lot to me and much more to the children who Four Walls helps every year. Do send me an email at 9 if you'd like more information about my ride or Four Walls. And do come along to wave me goodbye from my house when I leave on the 10 at midday.

Yours,

Huw

PS I'll be updating my blog throughout the journey so check out www.huw-lejog.com from April.

- 2 the address of the charity Four Walls
- 3 how to follow the progress of his ride
- 4 who he will be riding with
- 5 what the charity does
- 6 where he is cycling
- 7 what made him decide to do the ride
- 8 the amount he would like people to give

3 Look at these other types of letter. Cross out two things that you don't need to include in each letter.

- 1 A letter of complaint:
 - a) A-PS.
 - b) What you would like done about the complaint.
 - c) A description of the situation you are complaining about.
 - d) Your bank account details.
- 2 A job application:
 - a) Why you are interested in the job.

Reporting facts

- 1 Read the report quickly. Complete the sentence.

People are spending more money on:

- a) things they can't afford.
- b) unnecessary luxuries.
- c) everyday household items.

Reading an article reporting on consumer spending

Writing generalising; giving examples

Review the passive; comparatives

The 'buy it now' generation

The days when families would save up to buy a new toaster are over.

According to research carried out by the consumer spending analyst Mintel, total spending in Britain has increased by nearly half over the last ten years. Apparently, while housing is, on the whole, our biggest area of investment it's the spending on 'big treats' that appears to be growing the most. "Compared to ten years ago," said the author of the study, "we're living in a 'must have' society in which people seem to expect to have what they want whenever they want, even if it means getting into debt in order to pay for it."

Holidays are apparently the favourite non-essential buy and the move towards frequent short breaks is believed to be responsible for the increase in expenditure. Spending on motoring has also increased significantly. However, although the new models inspire interest, the report says that in most cases people tend to be buying second-hand cars.

Preferences in the home appliances market, another area that has seen big growth, have also changed. Whereas ten years ago most spending on this area tended to be on 'white' goods such as fridges, dishwashers and freezers, the preference is now in the main for home entertainment systems like TVs, DVD players and stereos. Particularly popular is the home computer, which accounts for by far the biggest increase in spending.

Generally speaking, spending on everyday purchases like food, drink and

clothes is declining, while sales of luxury products such as plants and flowers (up 95%), hair and beauty treatments (up 56%), and household gadgets (up 62%) have increased dramatically. Occasional items that are neither essential nor luxury, such as books, gym membership and visits to the cinema, also appear to be getting more popular, growing by 49% to account for 16% of the consumer market.

However, although economists tend to make a connection between spending and quality of life, this is apparently not the case. A recent survey in the *Sunday Times* has shown that once people have enough money to buy the basic things in life, money doesn't add to happiness. Although spending in Britain has trebled in the last fifty years, our happiness hasn't increased at all. Richard Layland, author of *Happiness*, agrees. In the writer's view, what does make people happy is the same as always – friends, marriage, socialising and pets. What doesn't make people happy is the worry of having to pay off their shopping debts!

- 2 Read the report again and answer the questions.

- 1 What are people prepared to do in order to get what they want?
Get into debt.
- 2 What kind of holidays have led to an increase in spending?
- 3 What kind of cars do most people spend their money on?

- 4 What kind of home equipment are people spending less on these days?

- 5 Which home technology equipment has increased its sales the most?

Which non-essential products have almost doubled in popularity?

- 7 What do people worry about after going shopping?

Help with writing Generalising; giving examples

- 3 a) Look at the sentences. Circle the phrases used in the article.

- 1 ... it's the spending on 'big treats' that *is growing/ appears to be growing* the most.
- 2 ... people *expect/seem to expect* to have what they want.
- 3 ... people *are buying/tend to be buying* second-hand cars.
- 4 ... economists *tend to make/make* a connection between spending and quality of life.

b) Choose the correct phrase.

- a) The phrases *seem* and *appear to* make generalisations sound *more/less* certain.
- b) The phrase *tend to* emphasises that a generalisation is *always true/not always true*.

- 4 Look at the words and phrases in **bold** in the article. Match them to 1–3.

Website reviews

Reading a review of two websites

Writing reviews: beginning reviews, useful phrases

Review the Internet

A

digg News Videos Podca

All Topics Technology Science World & Business Sports

Have you ever thought about what it is that makes you read some news articles and not others? Basically, the more prominent the story, the more likely you are to read it. And who decides what is on the front page of the newspaper or the top story on the website? The editor, of course.

¹ Digg.com similarly features stories of the day – all in English – with an emphasis on technology and science. But ² what I love about digg.com is how it gathers and displays stories. It is entirely democratic. Anyone can post a story or website with a short comment and if users read (and like) the story, they 'digg' it, which means they click a button to recommend it. The more 'diggs' or recommendations a story receives, the closer it gets to the front page of the website.

³ Stories are grouped into seven main areas – Technology, World & Business, Sports, etc. Under the original poster's comment you can add your own opinion of the story. And each week, the makers of the website also produce a free podcast and video where they discuss some of their favourite stories.

⁴ A downside to digg.com's democratic approach is that sometimes stories are repeated and you find yourself reading something that you read a few months ago. However, in general there is plenty of variety on the website. It's my homepage at the moment and I often start my online day by reading one or two articles chosen by my fellow digg users.

1

Read the reviews quickly.

Write D (Digg.com), W (Wikipedia.org) or B (both).

Which website:

a) allows readers to vote on its content?

b) has video?

c) is multilingual?

2

Read the reviews again. Are the sentences true (T), false (F) or the reviews don't say (DS)?

- 1 ☒ T Digg.com is particularly good for news about technology.
- 2 ☐ Digg.com was the first to use the idea of 'voting' for the best story.
- 3 ☐ The people who started Digg have a TV show.
- 4 ☐ The reviewer likes Digg because of the quality of the stories.
- 5 ☐ The reviewer of Wikipedia uses it for his or her homework.
- 6 ☐ You can add information to any article on Wikipedia.
- 7 ☐ The users of Wikipedia deal with problems like vandalism.
- 8 ☐ Wikipedia is more accurate than other encyclopedias.

B

WIKIPEDIA

I can remember a past when difficult homework questions could only be answered if a) your parents knew b) you lived near the library or c) you were lucky enough to own a set of encyclopedias. I often used c). As long as the subject didn't begin with S, T or U – because we'd lost two of the books.

Then computers and the CD-ROM appeared. Suddenly encyclopedias had sound, videos and much more. Within a few years, my kids were showing me Wikipedia.org – an online encyclopedia with a difference.

Firstly, Wikipedia is huge. The number of articles is approaching 5 million and it is published in over 65 languages.

And, if you can't find the article you want, you can write it yourself. That's right: anyone can edit existing

articles or add a new one! ⁵ One of the drawbacks of this fantastic idea is that articles can suffer from vandalism. So controversial topics are 'locked' from editing and any problems are efficiently dealt with by the 500,000 registered 'Wikipedians'.

⁶ The website is very easy to navigate, with numerous hyperlinks from each article to many others. ⁷ Additional features include photos, sound and film clips with some articles.

But ⁸ one of the main strengths of Wikipedia is the range and relevance of the content. There are thousands of articles that you wouldn't usually see in encyclopedias and they are constantly being updated. Wikipedia is an incredible resource for everyone ... by anyone!

Help with Writing Reviews: beginning reviews, useful phrases

3 The beginning of a review is important because it encourages people to continue reading. Read the first paragraph of each review again. Which review begins by:

- a) asking you questions to make you think?
- b) trying to make you laugh?

4 Look at the underlined phrases in the reviews. Fill in the gaps with phrases 1–8.

- a) saying what the website contains

Digg.com (similarly) features

- b) saying how the website is organised

- c) the good points about a website

- d) the bad points about a website

5 Read the beginnings of reviews 1–4. Which one:

- a) tries to interest you by making a comparison? ... 3
- b) tries to surprise you?
- c) uses the plot of the story to interest you?
- d) is extremely critical?

1 In last night's *EastEnders* (BBC 1) Kevin finally died. Rather than moving, the episode was ridiculously sentimental and about as realistic as the chances of me appearing on the show.

2 Four hours long, with an unknown cast and a depressing plot about poor teenage criminals in poor areas of South America, *La Trampa* (The Trap) does not sound gripping. But it is. In fact, it's the most memorable film I've seen in over ten years.

3 Move over Harry Potter, children want to read about the world of spying now. And Anthony Horowitz's sixth instalment of Alex Rider's adventures, *Ark Angel*, should keep them happy.

4 *Fixation* (The National Theatre, July–September) is a scary tale of a woman whose obsession with a pop star takes over her life and eventually leads her to commit a crime she can never forget.

6 Complete sentence b) so that it means the same as a). Use between two and five words, including the word in brackets.

- 1 a) It also has free anti-virus software.
b) Additional features include free anti-virus software. (features)
- 2 a) The accuracy of Google is one of its greatest advantages.
b) _____ of Google is its accuracy. (strengths)
- 3 a) There are two sections on the website.
b) The website _____ . (grouped)
- 4 a) There are some of the best graphics I have seen in this game.
b) _____ of the best graphics I have seen. (features)
- 5 a) It's quite hard to find your way around the site.
b) The site _____ . (navigate)
- 6 a) The fuel consumption of this car is a problem.
b) _____ this car is its fuel consumption. (drawbacks)
- 7 a) I love this mobile because of its size.
b) _____ about this mobile is its size. (what)
- 8 a) One thing that isn't good about working at home is not seeing many people.
b) _____ working at home is not seeing many people. (downside)

7 a) Think about a website you know and make notes.

what it is _____
the content _____
what's good and bad about it _____
how the site is organised _____

b) Write a review of the website.

- Use your notes in 7a).
- Choose a suitable type of beginning from 3 and 5.
- Use phrases from 4 where appropriate.
- Read and check for mistakes.
- Give your review to your teacher next class.

A discursive article

Reading an article about combining parenthood and career

Writing a discursive article: common connecting words

Review connecting words

Working harder and longer, just to end up poorer, is making a lot of fathers think they should be prioritising their quality of life. In other words, doing a lot more of what they want to do. And top of the wish list – for 79 per cent of working fathers – is spending more time with their children.

The childcare choice

A
I am part of a dual-income family. That's right, both my wife and I have jobs. We also have children. We work at different times and everything depends on 'handover'. This works fine ¹**unless anything** interrupts the routine. Excuses for being late that begin with "My wife had to ..." don't impress. ²**So** I am always grateful for having an understanding employer.

B
I suspect that many are not so generous. And looking at the current generation of fathers the future is no better. ³**Despite** missing their children growing up, by 40, their salaries will be peaking* as they begin to be replaced by young graduates. And ⁴**along with** this pay cut comes the news that the government intends to increase the retirement age to 68.

C
Some men can take time off work, usually ⁵**as a result** of a good redundancy package. New father Chris Prince took this option, but he is hoping to pick up a little freelance work over the next year. But if someone isn't offering you some money to leave your job, then what other options are there?

D
You could swap roles. Mother becomes the breadwinner* and father becomes a full-time parent. But this still leaves one of you facing an eight-hour day and then childcare at home – a good recipe for trouble. ⁶**What's more**, it still might leave some people with the problem of only one income.

E
⁷**On the other hand** you could go part-time. Obviously you're going to take a pay cut. And there are other problems too: "I've noticed myself working on my days off, getting up early so I can put in a few hours at the office before everyone else wakes up," says John Dorian, father of two and part-time web designer.

F
John believes he has a considerate employer and his career won't suffer for his choice, ⁸**although** the evidence from women is not encouraging. A woman who has worked part-time for just a year suffers a ten per cent long term reduction in earnings.

G
Personally, my wife and I aren't about to change our system. We know it's not perfect, but it (usually) works. We know we're sometimes too tired to do our best with our children. But we're good parents. Promise.

* **peaking** = reaching their highest point

* **breadwinner** = the person who gets most of the family's income

Our trip

Hi Ellie,

Just couldn't wait to tell you about our trip to Scotland! As you know, it was Sally and George's wedding on the Friday and we weren't getting a train back till Sunday morning so on Saturday night we booked for one of ¹ those 'ghost walks' that Edinburgh is so famous for.

I wasn't very ² **impressed** by the tour at first – we just walked round the spooky bits of the city, which was OK, I suppose, but things didn't really begin to liven up until we went down into the vaults near South Bridge. Apparently, the BBC said it was 'possibly the most haunted place in Britain' and I can see why!

You go down a stone staircase into these dark damp rooms where families ³ **used to live** in the 18th century. Our guide, Fran, told stories about the place ⁴ **and said some people had seen a cobbler* working in a corner**. Robin was actually standing there, but he didn't seem to feel anything. Imagine our shock, then, when we looked at the digital pictures ⁵ **we'd taken**. Instead of Fran talking to the group we saw the whitish outline of a man, his face quite clear, with his arm out as if he were listening. There was no movement of air in the room and nothing on the wall, so it ⁶ **can't have been a shadow**.

Anyway, we continued our tour and in the last room I ⁷ **kept looking** at a particular corner. I had a feeling that a member of the tour company would jump out and scare us. I tried to focus on Fran's ghost story and suddenly I felt a really cold feeling through my right shoulder, up my neck and on my face, but not to my left side, which was warm. I looked over at the corner. Nothing! In the end, I swapped places with Robin, without saying anything to him. Almost immediately he said he could hear footsteps and he felt like I had. We both got the impression that the spirit was irritated and wanted us to leave. So I told the guide and she cleared the room. Out in the corridor, the coldness disappeared.

On the street, Fran gave us more details of the spirit we had experienced and others we had not. She said ⁸ **the tour group kept records of sightings**, including the cobbler and 'ours'. I know you'll be going up there next month, so make sure you go on the tour and tell me if you see anything.

The wedding was great, by the way! The weather was fantastic and Sally looked gorgeous. Have a good week,

Sarah

Hi Pat,

I haven't heard from you for ages – hope all is well!

Just to say that I bumped into a woman in the street a few weeks ago who apparently was used to live next door to me in London, though I didn't recognise her. Her name's Carly – perhaps you remember her? I must get old, because I didn't! Anyway, it's weird because she's now living near me in Hull. How strange is that?

A month later we went on holiday to Corsica, as you know, and it turned out she was staying in the next room to us at the hotel! Can you believe it? Not only that, she's married to a man who I knew him many years ago. In fact I went out with him at the university. Their children even have the same names as mine.

I thought you'd like this story!

Must fly!

Love to everyone,

Julie

Hi Harry!

Just got back from a great week in Disneyland with the kids. We already went many years ago, but it was the first time for them. As you'd expect, they loved the rides – well most of them! There was one embarrassing occasion when I asked Jamie did he want to go on the ghost ride and he said he did. But halfway through he got scared at it and we had to ask them stopping the ride so he could get off. Anyway, hope you had a good holiday, too. Will be in touch soon.

Best,
Alex

Upper Intermediate Workbook

face2face

face2face is a general English course for adults and young adults who want to learn how to communicate quickly and effectively in today's world. Based on the communicative approach, it combines the best in current methodology with special new features designed to make learning and teaching easier. Vocabulary and grammar are given equal importance and there is a strong focus on listening and speaking in social situations.

face2face is fully compatible with the *Common European Framework of Reference for Languages* (CEF) and gives students regular opportunities to evaluate their progress. **face2face** Upper Intermediate completes B2.

The **Student's Book** comes packaged with a free fully-interactive CD-ROM/Audio CD with over 200 exercises in all language areas, including video, games, recording capability, progress chart and customised tests. There is also a selection of material from the *Real World* lessons which can be listened to on normal CD players.

The Workbook contains:

- Self-study exercises for every lesson of the Student's Book.
- Full Answer Key.
- References to the interactive Language Summary at the back of the Student's Book.
- A 24-page Reading and Writing Portfolio linked to the *Common European Framework of Reference for Languages*.
- A comprehensive list of 'Can do' statements allowing students to track their own progress.

CAMBRIDGE INTERNATIONAL CORPUS

The Cambridge International Corpus (CIC) is a collection of over 1 billion words of real spoken and written English. The texts are stored in a database that can be searched to see how English is used. The CIC also includes the Cambridge Learner Corpus, a unique collection of over 65,000 exam papers from Cambridge ESOL. It shows real mistakes students make and highlights the parts of English which cause problems for students.
